

Technical Data Sheet

SP-78 Anti-Skid Additive

Revision
April, 2021

See your MAC Coatings representative for specific performance characteristics or requirements.

Description

Add to sealers, paints, and other coatings to create a slip resistant surface.

Suitable for interior and exterior use.

100% natural, recycled, non-toxic material.

MacSEAL Anti-Skid Additive is designed to create a slip resistant surface on walkways, pool decks, driveways, stairs, and other areas where a slip resistant surface is required

Surface Preparation

Substrates should be free of oil and other contaminants. Oily patches can be treated with Xylene. Sweep or blow all debris from area to be treated.

Directions

Add one 1lb bag of MacSEAL Anti-Skid Additive to a 5-gallon pail of MacSEAL Concrete Sealer or other coating. Mix thoroughly before and during application. Two 1lb bags can be used to further enhance slip resistance.

Physical Properties

NOTE: All specification data is represented as general laboratory or production results and does not necessarily constitute a specification. Values not represented as ranges are intended as typical.

The ratings and data contained herein are based on information obtained through experimental laboratory methods. They are offered in good faith, however without guarantee to individual results, as the customer's applications, requirements; conditions and methods of use are beyond our control. We recommend that the customer determine the suitability of these materials before adopting them for its own use.
